

Merging Overlays in Cadra

First you need to create the Cadra files that you want to merge together, once this has been completed...

- * Open up a new Cadra file
- * Select file/overlay/create list
- * Select line 2
- * Select add

You will now get an open dialog box, browse through to the directory that contains your Cadra files that you want to make into overlays. Select the file then select open.

- * Select line 2 that will now have your file name next to it, it will highlight, select read. You will notice that overlay 2 will now say loaded.
- * Now select line 3 and do same steps as above, do this till all files have been selected.
- * Then select o.k.
- * Select the "Show Overlays" box at bottom of dialog box
- * Select o.k.
- * You will now see all of your files inserted as overlays.

To merge into one file

- * Select file/overlay
- * Select list
- * Select merge

All of your files will now be merged into one.
