

Cannot Read or Write DXF on UNIX Sun Stations

The information in this tip applies to:

- ExpertCAD (on UNIX Sun stations)
-

ISSUE

When you try to read or write a DXF file ExpertCAD reports that the translation has failed.

RESOLUTION

On UNIX Sun stations you must first set the LD_LIBRARY_PATH environment variable correctly.

Add the following line to your .cshrc file:

```
setenv LD_LIBRARY_PATH "/usr/openwin/lib"
```

For Bourne shell (sh) users add the following to your .profile file:

```
LD_LIBRARY_PATH=/usr/openwin/lib  
export LD_LIBRARY_PATH
```

Open up a new command prompt window to accept the changes.
