

# ExpertCAD™

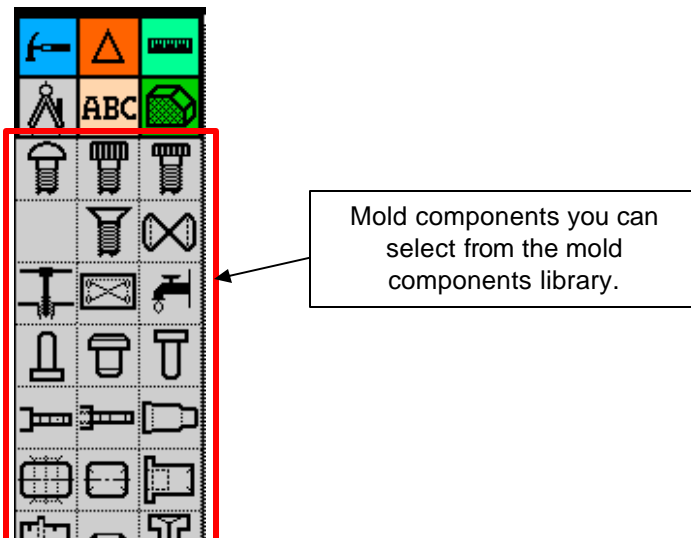

## How to Load the Mold Components Library

The information in this tip applies to:

- ExpertCAD (Windows versions)

### SUMMARY

ExpertCAD ships with a mold components library that you can load up.

### MORE INFORMATION

To load the mold components library, add the following line to your expcad.cfg file:

```
set-lib 0 mold
```

The next time you start up ExpertCAD, you should see a new icon in the yellow graphic icons area that let's you use the mold components library. Clicking this icon will bring up the different mold components.
