

Multi-Line Notes Not Translated Properly When Writing As AutoCAD File

The information in this tip applies to:

- ExpertCAD 7.3

ISSUE

When exporting an ExpertCAD drawing to AutoCAD DWG or DXF format, multi-line text notes don't translate correctly. The text is erroneously translated into one line, and the scaling is off.

RESOLUTION

This issue can be corrected by enabling scaleable text in ExpertCAD before exporting to AutoCAD DWG or DXF format. To enable scaleable text, go to the **SYSTEM** -> **SET-UP** menu, and click on **Notes...** to bring up the Notes dialog. Now check the **Scaleable Text** checkbox and hit **OK**. See the diagram below.
