

# PROSPECTOR™

THE GOLD STANDARD IN TOOLMAKING

## How to Print Programs without Spanning Them on Separate Pages

The information in this tip applies to:

- Prospector (all versions)

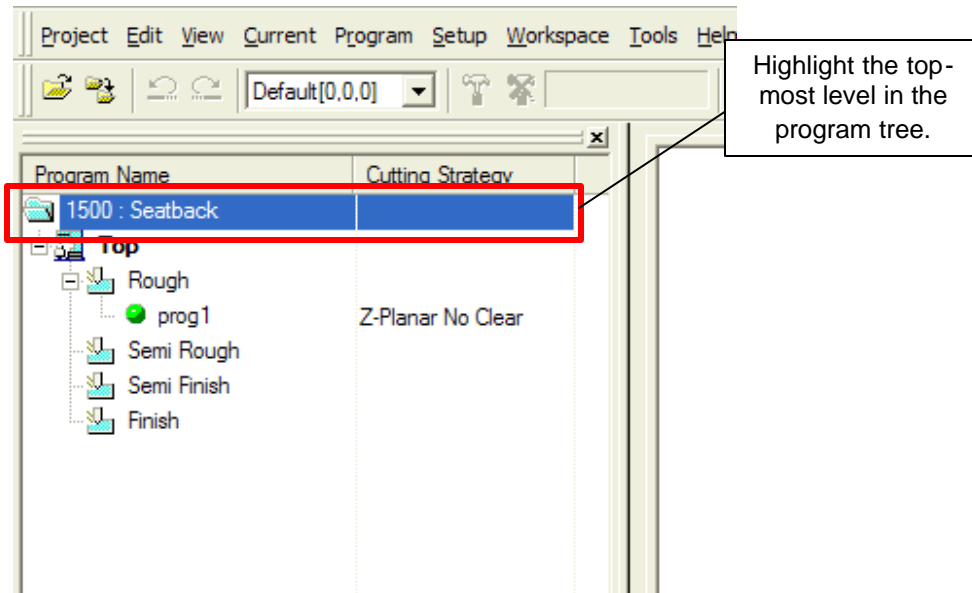

### **SUMMARY**

When you do a **Project -> Print** to print the program list, you may prefer that the information is not printed each program to its own separate page.

### **MORE INFORMATION**

To print the program list so that the programs are printed without separating each program to its own page, do the following:

1. Highlight the top-most level in the program tree on the left.

2. Now click **Project -> Print** (if you wish to preview, do a **Project -> Print Preview** first).
