

## Adjusting Margin Size for Printing

Both ExpertCAD and ExpertCAD3D use the same text buffer for adjusting the margins. In your custom configuration file:

```
ExpertCAD: (Windows expcad.cfg)
ExpertCAD3D (Windows expcad3d.cfg)
```

Append the following 2 lines:

```
-- This text buffer will set the margin size
set PRINT_SHRINK_FACTOR <value>
```

Valid values are from 0.2 to 1.0. The larger the value, the smaller the margins will be.
