

How To Remove Duplicate Profiles or Duplicate Surfaces

The information in this tip applies to:

- ToolDesigner

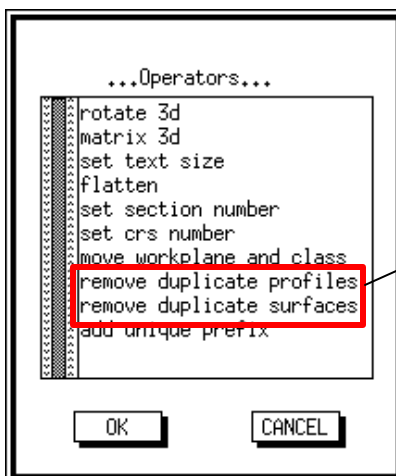

SUMMARY

ExpertCAD 3D allows you to remove duplicate profiles and/or duplicate surfaces.

MORE INFORMATION

To remove duplicates, do the following:

1. Removing duplicates works based on the class **intersection visible**, so make sure all the profiles and/or surfaces are visible.
2. Click on the following operation icon  to bring up the **Operators** panel.
3. In the **Operators** panel, select either **remove duplicate profiles** or **remove duplicate surfaces** as desired and then click **OK**.

Select the appropriate action, then click the **OK** button.
