

Reading and Writing of Certain Files is Slow

The information in this tip applies to:

- ToolDesigner all versions

ISSUE

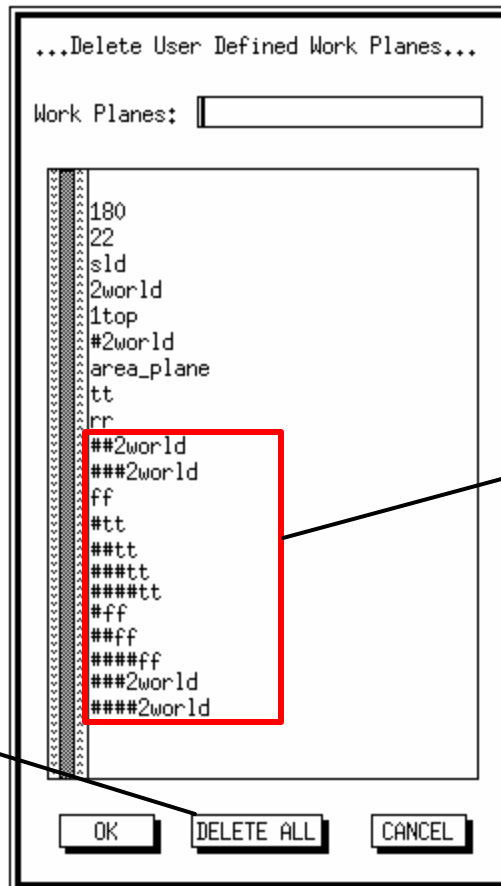

Certain files take a long time to read and/or write.

RESOLUTION

You may have an unusual number of User Defined Work Planes defined in the drawing.

To delete these User Defined Work Planes follow these steps:

1. Click on the following icon  in the **Work Plane** pad of icons to bring up the **Delete User Defined Work Planes** panel.
2. In the **Delete User Defined Work Planes** panel select the work planes you would like to delete.

Select the work planes, then click the **OK** button.

To delete **all** the user defined work planes, click the **DELETE ALL** button.
